Summary

The key things that I follow in my work are: attention to detail, compatibility, accessibility and semantics.

Skills

HTML, CSS, Pug, SASS, Stylus, PostCSS, BEM, SMACSS, JavaScript, jQuery, Node.js, React, JSX, Babel, ES6, Webpack, Gulp, Bootstrap, Foundation, PHP, Yii, Git, Linux, Docker, Jira, Trello, TeamCity, Sketch, Photoshop, intermediate English (written and spoken)

Experience

Frontend Developer at PDFfiller (July 2015 – June 2017)

PDFfiller is online document management platform that provides the services of an online editor, cloud storage platform, and a signature request manager.

I worked on the full stack of frontend development tasks in marketing and product teams, such as:

- create reusable UI components
- make fully functional, mobile-friendly web applications (landing pages, micro-sites, dashboards etc.)
- create React stateless components library
- maintain core UI components styleguide
- craft bulletproof email templates
- setup a/b tests
- setup frontend build tools
- code review, deployment

Frontend Developer at <u>Aiken Interactive</u> (September 2012 – May 2015)

Aiken Interactive is a web agency with its own production studios and with full range of services for the digital market.

Working here I started using preprocessors and frontend build tools. My tasks were:

- create cross-browser, responsive and retina ready web apps from scratch
- integrate templates into AikenCMS, Magento, Wordpress
- maintenance of existing projects
- UI prototyping
- make email newsletter templates

Frontend Developer at <u>VisaHQ</u> (June 2009 – September 2012)

VisaHQ provides online visa services and U.S. passport solutions enabling travelers to apply online for visas to virtually any country in the world.

Working in this company I got my first true experience in web development:

- cross-browser and semantic coding with HTML, CSS and jQuery
- integrate product solutions into affiliate sites
- UI wireframing and prototyping
- create widgets and gadgets for multiple platforms
- make HTML templates for email newsletters

Education

Lugansk State Academy of Culture and Arts (2008 – 2009)

Sound Production

Severodonetsk Chemical and Mechanical College (2004 – 2008)

Software Engineering
